

The ARTIC 1500 (1.5 A) is specifically designed to charge 12 V batteries such as motorbikes, jet-skis, go-karts, quad bikes or lawnmowers, providing an automatic charge controlled by a microprocessor. Efficient, compact and light, it provides a 2 times faster charge than a traditional charger (no monitoring required).

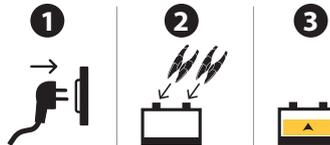

IDEAL FOR MOTORBIKES AND SMALL CARS

- **Designed for 12 V batteries from 3 to 40 Ah,** It can also provide a maintenance charging up to 100 Ah.
- **Optimised maintenance charge,** the charger can remain permanently connected for example whilst a vehicle is not in use over the winter. The «Auto Restart» function means that the charger will memorise the settings and restart automatically in the event of a power cut.

PLUG & PLAY SYSTEM

Simplified interface to prevent user errors. When connected and if the battery voltage is over 7 V, the ARTIC 1500 instantly launches the charge without user intervention.

100% AUTOMATIC CHARGE

The unattended charge and maintenance ensure maximum battery performance and longevity.

INTEGRATED PROTECTION

- **Protection of the vehicle's on-board electronics:** protection against short circuits, polarity reversal and overcharging. Spark prevention system.
- **Automatic stand-by mode** if the battery is disconnected.

ERGONOMIC

- Compact design, light and portable.
- Connection with quick connector.
- Shock-resistant housing, resistant to dust and liquid ingress (IP65).
